[1] QID: 8

Question : A program tries to access a character from a string using an invalid index, causing an exception. Identify and correct the issue.

```
public class Q7_StringIndex {  
    public static void main(String[] args) {  
        String str = "Java";  
        System.out.println(str.charAt(3));  
    }  
}
```

```
Program : import java.io.*;  
import java.util.*;  
class StringIndex {  
    public static void main(String args[]){  
        String str="Java";  
        System.out.println(str.charAt(3));  
    }  
}
```

[2] QID: 4

Question : A developer compares two strings using the == operator, which leads to incorrect output. Identify the issue and correct the comparison method.

```
public class Q3_StringCompare {  
    public static void main(String[] args) {  
        String s1 = "Java";  
        String s2 = new String("Java");  
        if(s1.equals(s2)){  
            System.out.println("Equal");  
        }  
    }  
}
```

```
}  
}  
}
```

```
Program : import java.io.*;  
import java.util.*;  
class StringCompare{  
public static void main(String args[]){  
String s1="Java";  
String s2=new String("Java");  
if(s1.equals(s2)){  
System.out.println("Equal");  
}  
}  
}
```

Input : (no input)

Output : Equal

[3] QID: 2

Question : The following Java program is intended to print all elements of an array. However , it throws an error during execution. Identify and correct the mistake in the loop condition.

```
public class Q1_ArrayIndex {  
public static void main(String[] args) {  
int arr[] = {10, 20, 30};  
for(int i = 0; i < arr.length; i++){  
System.out.println(arr[i]);  
}  
}  
}
```

Submitted Answers Report

```
Program : import java.io.*;  
import java.util.*;  
class ArrayIndex{  
public static void main(String args[]){
```

```
int arr[]={10,20,30};
```

```
for(int i=0;i
```

Input : (no input)

Output : 10

20

30

[4] QID: 16

Question : A program attempts to access an array using a negative index, causing an error. Identify and correct the problem.

```
public class Q16_Index {  
    public static void main(String[] args) {  
        int arr[] = {10,20,30};  
        System.out.println(arr[0]);  
    }  
}
```

Program : import java.io.*;

import java.util.*;

class Index{

public static void main(String []args){

int arr[]={10,20,30};

System.out.println(arr[0]);

}

}

Input : (no input)

Output : 10
